Glass Is What We Do

Kenyon's Glass prides itself on being one of the leading manufacturers of custom decorative glass for the building industry. Since 2000, we have been providing design expertise and production of custom decorative panels for windows, transoms, doors, and other unique installations. Our skilled team relies on traditional methods to handcraft individualized pieces of art glass that you will be excited to share with the world around you.

We focus on glass sizes, shapes, designs, and processes all day, every day.

We're experts in the fine art of cutting and fitting colors and textures to create a finished design. But we can also provide you with laser-cut metal panels that simulate wrought iron or impact-rated transom frames. Our broad experience with glass allows us to be successful in many areas of residential and light commercial applications.

Great Service Every Single Time

From the beginning of design conception to shipping the final piece, our team is working hard to insure a successful experience. Although our glass is custom, we want your service experience to be the same every single time. You can count on our in-house design capabilities, 24-hour turnaround on quotations, and product availability within 10 business days to get your custom glass order to you promptly.

DOORGLASS

Our in-house design team can assist you with choosing the right size, shape and glass to coordinate with the architecture of the home.

Custom doorglass will bring personalization to a home entry and amp up the curb appeal.

Choose from a hand-crafted art glass style, wrought iron, or a beautiful textured privacy glass. We also have specialty options like Low-E glass or laminated glass that can help with desired glass performance. We will provide a quote within 24 hours and produce your doorglass product 10 business days after you approve your quoted design.

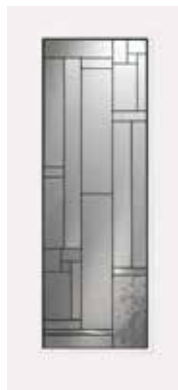

- Insulation options include Clear, Low-E, Lamine or select textured glasses
- Triple insulated glass is available in 3/4", 7/8", and 1" overall thickness
- Dual insulated glass is available in 1/2", 5/8", 3/4", 7/8" and 1"

Each piece of beveled glass is held together by caming.

Caming enhances the beauty of the beveled glass behind the Evolve® SDL Frame System.

*Additional configurations available for quote.

SIMULATED DIVIDED LIGHTS

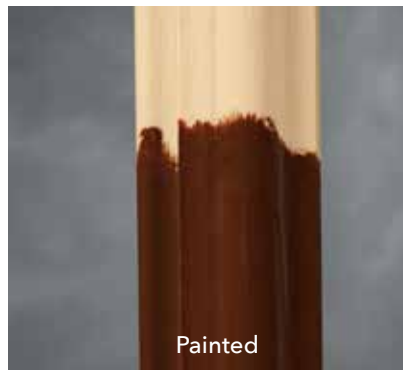

TRADITIONAL STYLE GRILLES WITH CLEAR BEVELED GLASS

Each piece of beveled glass is secured with coming for the beautiful look of a true divided light, with the efficiency of a single doorlight.

The beauty of beveled glass and coming combine for a distinguished take on traditional divided lights.

The traditional Simulated Divided Lights (SDL) are injection molded along with our Evolve® Frame to eliminate separate application of the SDL bars. This all-in-one design offers a better flush-to-glass fit.

Evolve's FiberMate® frames are paintable and stainable. They provide superior rigidity and eliminate bothersome squeeze out. We accomplish this by using a dry glaze seal. This latest innovation reduces scalloping, corner flare and warping.

TRANSOMS

Transoms allow more light to flow into your home while adding architectural interest.

Make a statement with a shaped or rectangular transom.

Our in-house design team will help you choose the size, shape, jamb thickness and glass for your transom application.

Rectangles

Shapes

- Rectangle and shape frame profiles available
- Paintable and stainable maintenance free materials
- Two jamb sizes: 4-9/16" and 6-9/16"
- Jamb extenders available
- 10 year warranty
- Rectangles available in 10 days + transit
- Shapes available in 20 days + transit

IMPACT TRANSOMS

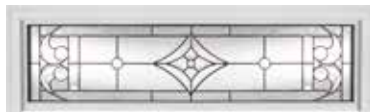

Our transoms have always brought beauty to the entryway and natural light into the home.

Now, first to market, they also come with the added safety benefit of being certified for use in Florida's High Velocity Hurricane Zones.

Florida approval number #27399

Design Pressure Ratings: Impact = +60/-65

Maximum height and width of transoms: 25 square feet

Impact Rectangles

Impact Shapes

- Transom IG has exterior clear glass and interior laminated PVB layer for maximum safety
- Specially designed trim strip allows for maximum water run off
- Rectangle and Shape frame profiles available
- Composite jamb material is primed white for painting
- Two jamb sizes 4-9/16" and 6-9/16"
- Jamb extenders available
- 10 Year Warranty
- Transom can be ordered with or without brickmold
- Rectangles available in 10 days + transit
- Shapes available in 20 days + transit

NEW WINDOW COLLECTION

Decorative glass windows remain a work of art in any application. Whether your project is a bay window above your bathtub or the historical preservation of a commercial building, our in-house team will help you choose the right design for the expression of art you desire.

Custom windows can bring beauty to a home.

We also offer laminated glass options to help noise suppression in urban areas or provide extra protection in severe weather regions.

Backer Glass

Decorative Panel

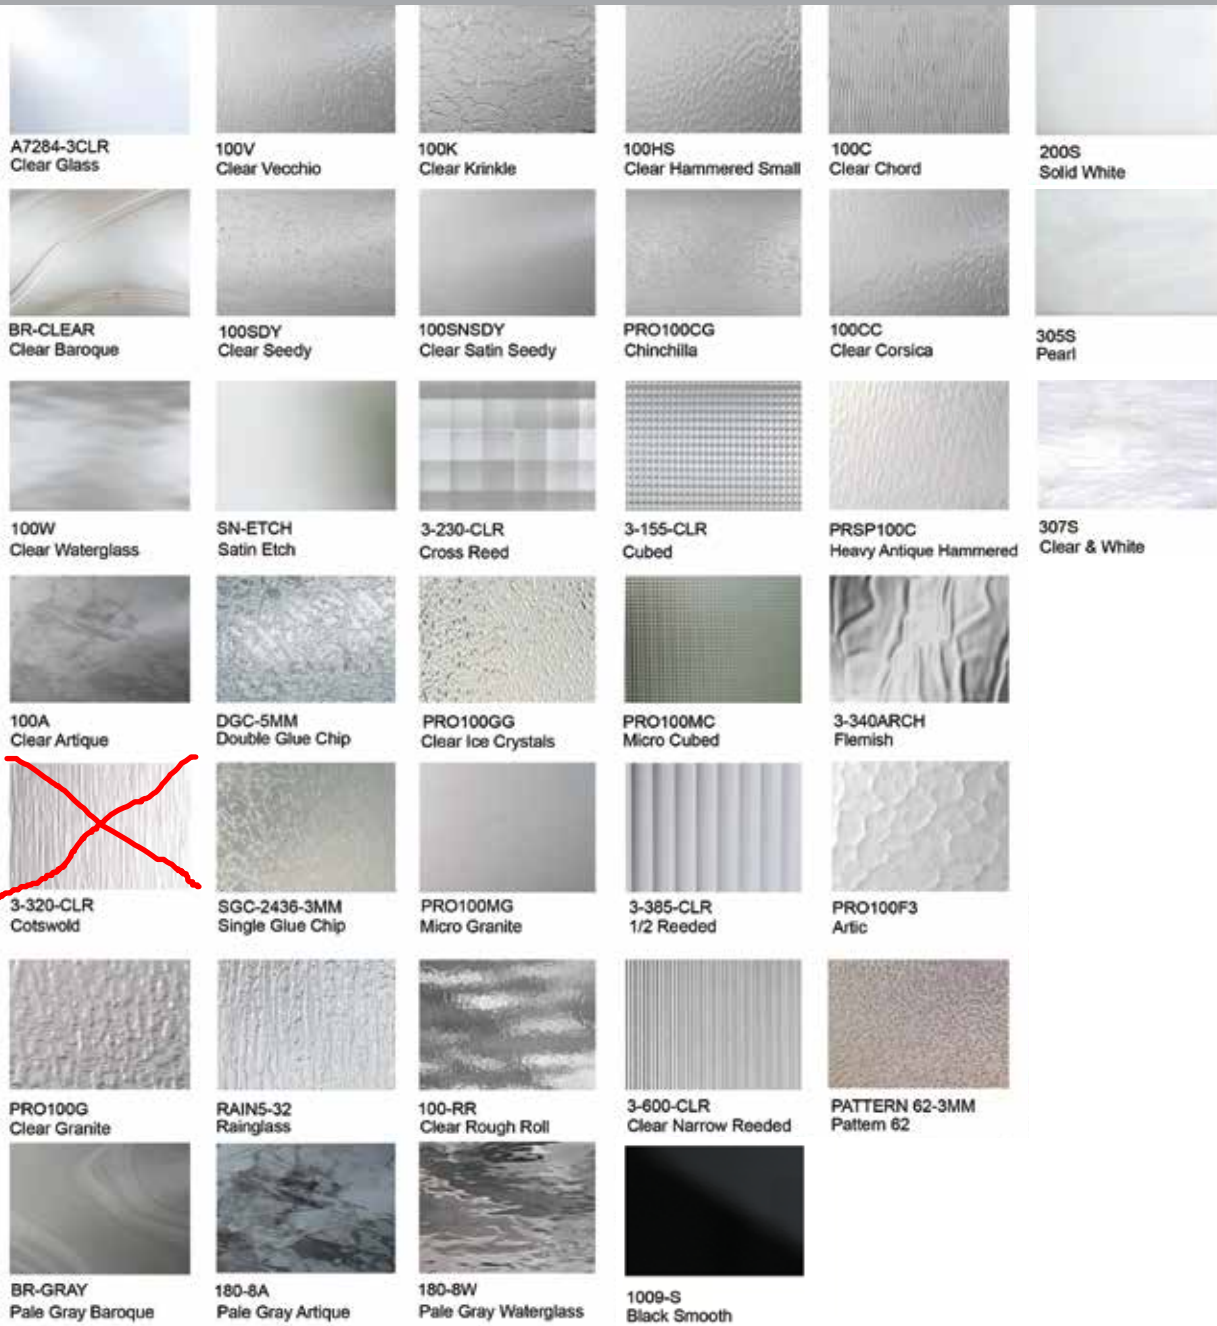

Backer Glass

- Insulation options include Clear, Low-E, Laminate or select textured glasses
- Available in 3/4", 7/8", and 1" overall thickness
- Dual insulated glass is available in 1/2", 5/8", 3/4", 7/8" and 1"
- Can accommodate up to a 25 sq.ft. window

Due to safety purposes Kenyon's Glass will no longer be offering annealed backers on units over 16" diagonally. We build one of a kind units that require special handling within our facility; adding tempered backers better protects your product for internal/external handline and shipping purposes. Special circumstances will be considered, please inquire if you have a unique project that requires annealed glass.

We can design from scratch or modify an existing design that you want to make your own into glass.

*Our passion for beautiful and quality work drives our purpose:
to provide you with exactly what you desire.*

If you can't pull it off the shelf as a standard piece of glass, we will create and produce it for you. Whether you are a window manufacturer, architect, door glass customer or homeowner, count on us to get the job done.
